

ACCIDENTS AND ILLNESS

In the event that an accident or illness requires medical attention, every effort will be made to contact the parent/guardian immediately. If this is not possible, the principal will, after consulting the student's information file, use his/her discretion in obtaining proper and speedy medical attention.

For minor ailments and injuries, the teacher/principal will use his/her judgment in calling the parent for advice or removing the student to a quiet place for observation.

Any student who shows symptoms of a contagious disease or condition—such as chickenpox, impetigo, head lice—will be sent home and must remain there until the condition is corrected.
